\*Product types are divided into two subsets. The first column is for the type of fuel which tells you the form it applies to. The second column is for the reporting impact.

**Fuel Type:**

Accountable – is only applicable to terminal operators and common carriers; includes products that are neither motor vehicle fuel nor diesel fuel.

Diesel Fuel – is any liquid that is commonly or commercially known or sold as a fuel that is suitable for use in a diesel powered highway vehicle; includes biodiesel.

Motor Vehicle Fuel – is gasoline and aviation gasoline, gasoline includes both finished gasoline and gasoline blendstocks and gasohol.

**Reporting impact** – all products must be reported by terminal operators and common carriers. The following grouping also applies to motor vehicle fuel suppliers and diesel fuel suppliers.

Taxable – Includes motor vehicle fuel and diesel fuel

Reportable – Restricted to diesel fuel suppliers, terminal operators and common carriers. All products must be reported on the applicable tax form, even though they are not taxable. Reportable products include jet fuel and kerosene.

Other – Products that are only reportable by suppliers when blended with gasoline or diesel fuel or when they are labeled for sale or sold as diesel fuel or gasoline.

Exempt – Restricted to dyed diesel fuel product codes.
